PRATIK ATUL GAIKWAD

Data Analyst

Nashik, Maharashtra | +91 9834553896 | mrpratikonline@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

IT graduate with experience in analyzing client billing, salary, and workforce data to track costs and profitability. Skilled in Excel, SQL, and Python, with additional experience in ERP reporting and business operations.

CORE SKILLS

Data Analysis Tools: Statistics, Microsoft Excel, Power BI

Querying & Programming: SQL, Python, Django ORM

Databases: PostgreSQL, SQLite, Relational Schema Design, Data Modelling

Business & Domain Knowledge: ERP Reporting (Procurement, Inventory, Vendor Data), Process Documentation, SOP Design, Stakeholder Coordination

Tools: Git, GitHub, VS Code, MS Excel, Generative AI tools for data workflows

PROFESSIONAL EXPERIENCE

Data Analyst — *Mar 2026 – Present*

Rainbow Deco Plas Pvt. Ltd — *Nashik, Maharashtra*

- Analyze monthly billing and salary data across client companies to track revenue, costs, and profitability.
- Prepare profit and loss reports to compare client performance and identify areas for improving profit margins.
- Compare service charges, salary costs, and employee strength across clients to understand business performance.
- Analyze employee retention and tenure across client companies to identify workforce trends.
- Share findings with management to support business planning and client-related decisions.

Technical Operations and ERP Support Associate — *Nov 2025 – Feb 2026*

Pamtsoft Infosolutions (Client: Entraco Bks Busducts Pvt. Ltd.) — *Nashik, Maharashtra*

- Worked directly with ERP-generated business reports (purchase order volumes, vendor ratings, stock movement) to support procurement and production decisions, building practical fluency in how operational data is structured and consumed.
- Assisted in configuring ERP workflows across Purchase, Store, Production, and Quality modules, gaining first-hand understanding of how transactional data flows through a multi-module business system.
- Coordinated issue resolution between business users and technical teams, translating data and system issues into clear, actionable explanations for non-technical stakeholders.
- Trained department users on ERP operations, strengthening ability to communicate data and process concepts to business audiences.

Web Developer Intern — *May 2025 – Nov 2025*

A2Z IT Hub Pvt. Ltd. — *Nashik, Maharashtra*

- Built backend features using Django ORM, working directly with relational data models – the same schema design and query logic foundations used in analytics work.
- Optimized query handling and model relationships, improving data retrieval efficiency on existing modules.
- Maintained version control using Git and GitHub in a collaborative development environment.

PROJECTS

Interactive Sales Performance Dashboard for Ferns and Petals (FNP) | Github

Tools: Microsoft Excel, Pivot Tables, Pivot Charts, Slicers, Conditional Formatting

- Designed an interactive Excel dashboard to analyze gifting sales performance using transactional data from 1,000 orders.
- Created dynamic KPI cards for Total Revenue (₹35.2L), Total Orders, Average Delivery Time, and Average Customer Spending.
- Performed sales analysis across products, occasions, cities, weekdays, and monthly trends using Pivot Tables and Pivot Charts.
- Enabled interactive business reporting through slicers, allowing users to filter insights by occasion and order/delivery dates.
- Identified key business insights, including top-selling products, highest revenue-generating occasions, and seasonal sales patterns.

LogMate – Internal Logging & Activity Tracking Tool | GitHub

- Designed relational database models to structure daily activity records for time-based reporting and filtering (1, 7, 30 days).
- Built and deployed a tool actively used to log 60+ real entries, providing first-hand experience in how clean data capture enables reliable downstream reporting.

CURRENTLY BUILDING

- Completing "Data Analyst with Generative AI" certification – Analytics Benchmark (in progress).
- Developing Power BI proficiency to complement existing Excel and SQL foundations.
- Practicing intermediate SQL (multi-table JOINs, aggregations, subqueries) beyond current applied level.

EDUCATION

B.E. in Information Technology *2021 – 2024*
Sandip Institute of Technology and Research Centre, Nashik *GPA: 7.51/10.0*

CERTIFICATIONS

- Data Analyst with Generative AI – Analytics Benchmark (In Progress)
- Java + Python Full Stack Development – CoDingSeekho Institute (2025)
